Terminals and Solutions

About SUNMI

SUNMI is leading the move to Android for business digitization solutions through attractive business IoT devices and End-to-End platform. We have more than 15 overseas branches spreading across five core regions: Asia-Pacific, Europe, North America, Latin America, Middle East and Africa.

SUNMI BioT Product Ecosystem

SUNMI Business IoT Products

SUNMI has rolled out a wide range of IoT products created for the retail, restaurant, financial, healthcare, and the public sector among other sectors.

SUNMI End-To-End Platform

SUNMI's value proposition is not only attractive devices. It is an End-To-End Platform and a full ecosystem. Manage your device fleet, keys and contents. And reduce your costs.

SUNMI OS (SUNMI Business Operating System)

SUNMI OS acts as a hardware abstraction layer over the entire SUNMI device portfolio to enhance user and customer experience.

Business Solutions for All Industries

Together with partners around the world, SUNMI creates digital solutions for businesses including retail, F&B, finance, logistics, public services, transportation, and more.

Kiosk

Terminals and Solutions

The ever-increasing demand on information-based systems and service efficiency have driven the rapid development of kiosks. SUNMI kiosks, being applicable in self-checkout, self-ordering and self-help service handling among other services, efficiently improve store operations with digital transformation and bring a convenient experience to more customers.

K Series

Smart Kiosk Terminal

Being able to cut store operating costs and add more interests to shopping, kiosks are becoming increasingly popular among clients in different industries.

SUNMI K2 Industry-Tailored Versions

Retail Version

- Tray table
- Product scan
- QR code scan
- Card payment*
- Receipt printing

Restaurant Version

- Contactless loyalty card reading
- QR code scan
- Card payment*
- Receipt printing

Scalable Version

Scalable metal stand

- QR code scan
- Card payment*
- Receipt printing
- Medical card reading (optional)
- A4 laser printing (optional)

Extendable Version

(options available)

- RFID identification
- Label printing
- Perforated invoice printing
- Ticket printing
- A4 laser printing
- Card dispensing (support Mifare one & ISO 14443A)

*Combine a SUNMI P series terminal with the kiosk to accept card payments.

SUNMI K2 Selling Points

7-color status indicator light

24" FHD screen

Facial recognition. A 67.9° visual angle for customers 1.5~1.9m tall.

Six-core 1.8GHz. More suitable for self-service equipment.

4G RAM + 16G/32G ROM. Ensures you smooth operations.

58mm / 80mm Japanese Seiko print engine.

2.4GHz/5GHz Wi-Fi dual band, stable connection.

SUNMI K2 Retail Version*

Floor-Standing/Wall-Mounted

Four Versions Available

Retail, Restaurant, Scalable and Extendable.

Elegant, and Practical

Concise style, slim body.

Gain a better visual and use experience with a 24"

FHD 10-point capacitive touch screen.

Modular Design

The modular design offers K2 flexibility and scalability to be more industry-tailored. Modules for ID card reading and medical card reading, among other modules, can be added.

Bank Card Payment

Combine a SUNMI P series product with the kiosk to accept bank card payments.

*POS terminal holders are customizable.

SUNMI K2 MINI Smart Kiosk Terminal*

For a more compact self-service experience.

Multiple Options

Wall-mounted, single-display and dual-display options are available.

Lightweight, No Assembly Needed

Being only half the size and weight of a traditional kiosk, a K2 MINI only weighs 10Kg. The integrated design also requires you no efforts to assemble.

Highly Scalable

Modules for ID card / contactless card reading can be added, thus making it applicable in more scenarios.

Grow a stronger business with SUNMI and our partners.

Komai-so

Malaysia's first digital flat price store that offers three price options for all items.

"The adoption of SUNMI Kiosk in self-checkout has shortened checkout lines, and all detailed info of the product can be seen by scanning the barcode, as well as the discounted price. We can get receipts once the payment is done. We can also get timely assistance once we need. It is quite convenient."

— A customer

SUNMI Product Used

SUNMI K2

Applications

Self-checkout and receipt printing.

Value

Shortened waiting lines, reduced checkout workload and improved store operational efficiency.

INFI: A well-known restaurant solution integrator in the United States.

"Guests can order at K2 MINI, select what they want, check order details and pay at the external POS terminal. Then pick up with the tickets printed when what they ordered are ready. That makes a smooth dining experience."

— A restaurant manager

SUNMI Product Used

SUNMI Product Used

Value

Increased operational efficiency and decreased labor costs.

Applications

Self-ordering, payment taking, ticket printing.

POPEYES

Popeyes: An American multinational chain of fried chicken fast food restaurants with over 3000 restaurants in 25 countries.

"The adoption of SUNMI Kiosk in self-ordering and facial recognition payment has shortened checkout lines and saved us a lot of time."

—A waiter, Popeyes Flagship, Shanghai

SUNMI Product Used

SUNMI K2

Applications

Self-ordering and self-checkout.

Value

Shortened waiting lines, reduced checkout workload and improved store operational efficiency.

Freshippo: A data- & technology-driven new retail platform of Alibaba.

"To Freshippo, Freshippo mini is a new attempt. For those who working in offices, we launched Freshippo mini, which provides breakfast and lunch to address white-collar's every day pain points. The smooth self-service enabled by K2 MINI has enhanced our operational efficiency and saved customers' valuable time."

—Store manager, Freshippo mini, Xingzhan

SUNMI Product Used

SUNMI K2 MINI (ReX Flix)

Applications

Self-checkout and self-service meal pickup.

Value

Higher checkout speed, better customer experience, enhanced store operational efficiency and saved labor cost.

Empower offline businesses with co-developed digital solutions.

Information-based talent pool management (self-service job seekers' information registration), SUNMI K2, Talent Service Center of Huaihai City, China.

Self-service entry and exit services handling, SUNMI K2, Wuhan Administrative Service Center (Wuhan Citizens' Home), China.

Self-checkout and receipt printing, SUNMI K2, a convenience store in a gas station, China.

Self-checkout, SUNMI K2 MINI, an EGO Convenience Store, China.

ID verification, filing, self-service payment and reservation, SUNMI K2, a driving school, China.

Vaccine registration, vaccination and observation, SUNMI K2, a community hospital, China.
